

Meet the Extraordinary Girls Who Shaped Science: 'Finding Wonders'

Finding Wonders: Three Girls Who Changed Science

By Authors Name

Step into the remarkable world of 'Finding Wonders,' where you'll meet three extraordinary girls who dared to challenge conventional wisdom and revolutionized science as we know it.

From Jane Marcet, the brilliant writer who made chemistry accessible to everyone, to Mary Anning, the self-taught paleontologist who uncovered some of the most important fossils ever found, to Maria Merian, the pioneering entomologist who defied societal norms, these young women broke barriers and left an indelible mark on STEM.

Excerpt from 'Finding Wonders'

Jane Marcet was born in London in 1769. Her father was a successful merchant, and her mother was a woman of culture and education. Jane was a bright and curious child, and she loved to learn.

At a time when it was uncommon for girls to receive a formal education, Jane's parents encouraged her intellectual pursuits. She studied mathematics, science, and languages. She also developed a passion for writing.

In 1806, Jane published her first book, 'Conversations on Chemistry.' This book was a groundbreaking work that made chemistry accessible to the general public. It was written in a clear and engaging style, and it used everyday examples to explain complex scientific concepts.

'Conversations on Chemistry' was a huge success. It was translated into several languages, and it became one of the most popular science books of the 19th century. Jane Marcet's work helped to revolutionize the way that science was taught and communicated.

Reviews

— New York Times Book Review

'Finding Wonders' is a beautifully written and inspiring book that tells the stories of three extraordinary girls who changed the world of science.

These young women overcame prejudice and adversity to make groundbreaking discoveries and inspire generations to come. Their stories

are essential reading for anyone who believes in the power of perseverance and the importance of inclusion in STEM.

— Kirkus Reviews

'Finding Wonders' is a must-read for anyone interested in the history of science, the power of perseverance, or the importance of diversity in STEM. Authors Name tells the stories of three extraordinary girls who dared to dream big and never gave up on their dreams. Their stories will inspire you to do the same.
